

# Hostel Management System

Mini Project

## **PRESENTED BY,**

1. Vinod Kumar .L - 950019104050
2. Kaikondar .S - 950019104019
3. Basvan .V - 950019104009
4. Sathees Kumar.K - 950019104302

Under the guidance of:  
**Dr.S.Sabena AP/CSE**

## INTRODUCTION

- ♦ HOSTEL MANAGEMENT SYSTEM is proposed to reduce the problems faced by the traditional systems .
- ♦ The proposed system is designed to limit the human works and make hostel allocation much easier for students and hostel administrators.
- ♦ This system includes the following modules : Student Registration, Leave Letter Management, Mess billing, Room Management.
- ♦ All the events and activities that take place in the college is updated regularly by the admin.

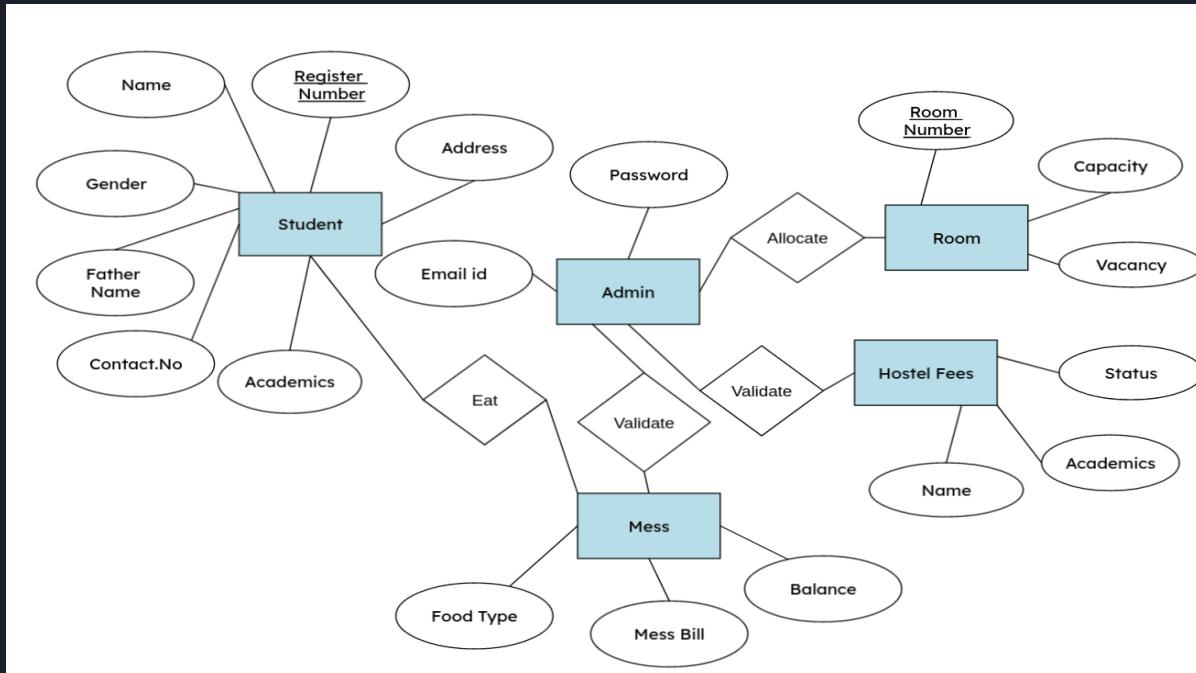

## OBJECTIVE

To Develop a Web app for Hostel Management System which can automate all the manual operations of the hostel.

# ARCHITECTURAL DESIGN FOR THE PROPOSED SYSTEM

## Entity Relationship Diagram:

# **MODULES DESCRIPTION IN DETAIL**

## **ADMIN MODULE**

- ♦ In Admin module, student details and staff details are entered by admin.
- ♦ Updation of student details and staff details can be performed by them.

### **LOGIN PAGE FOR ADMIN**

- ♦ Describes admin must enter the username and password for login process.  
If the Username and password is incorrect, then he/she is not allowed to log into the system.
- ♦ Forgot password and Reset, password options were also given.

### **Admin Can View Student Details**

- ♦ Describes the process of viewing the details of students.
- ♦ Admin can view the details of a particular student such as Roll number, Name, Father's Name, Gender, Place, Department, Academics, Food, Email, Father number and Student number

## **STUDENT MODULE**

- ♦ In Student module, a new student can register in the hostel by filling the details form, the students can view their profile by logging with their username and password.

### **Login page for student**

- ♦ Describes that the students must enter the username and password for login process .

### **Reset Password Option**

- ♦ Describes that if the students want to reset their password By entering the username, old password and new password ,they can reset their password.

### **New User Registration Form**

- ♦ Describes that, if a new user wants to register in the hostel they can register by using the new user module.

### **Student's Profile**

- ♦ Describes the profile of students in which they can submit their leave letter form, upload the mess bill receipt, reset their password and they can also write their feedback about college hostel

## **ROOM MANAGEMENT MODULE**

- ♦ In Room management module, the rooms are allocated for the hostel students respectively. The rooms are allocated separately for both boys and girls by the admin.

### **Room Availability For Students**

- ♦ Describes the room availability for hostel students. Rooms are allocated to the students by the admin of the hostel and editing the details is done by caretaker of the hostel.

### **Viewing Room Availability**

- ♦ Describes the availability of rooms in the hostel can be viewed by the students which is updated by the caretaker of hostel.

## **MESS BILL MANAGEMENT MODULE**

- ♦ In mess bill module, the student can pay their mess bill and the admin can update the students who have paid the mess bill.

### **Uploading Mess Bill Receipt**

- ♦ Describes that the students are asked to insert their receipt of the mess bill using insert option and that image of their receipt is viewed by the admin.

### **Alert Message For Mess Fees Balance**

- ♦ Shows an alert message of mess fees balance for the students while uploading their mess bill receipt.

### **Viewing Mess bill Receipts**

- ♦ Describes the mess bill receipts uploaded by the students can be viewed by the admin. The receipts can be viewed separately for both boys and girls according to the academic year.

## Summary

Hostel management system is designed to manage all hostel activities like hostel admissions, fees, room, mess allotment, hostel stores & generates related reports for smooth transactions. It is also used to manage monthly mess bill calculation, students details, room allotment.

# Admin DashBoard

The screenshot shows the Admin Dashboard of a Hostel Management System. The dashboard features a sidebar on the left with navigation links for Dashboard, Courses, Rooms, Student Registration, Manage Students, and User Access logs. The main content area is titled "Dashboard" and displays three key statistics in colored boxes: 1 STUDENTS (blue box), 5 TOTAL ROOMS (green box), and 7 TOTAL COURSES (blue box). Each statistic has a "FULL DETAIL" link below it.

## ManageStudent.php page-2

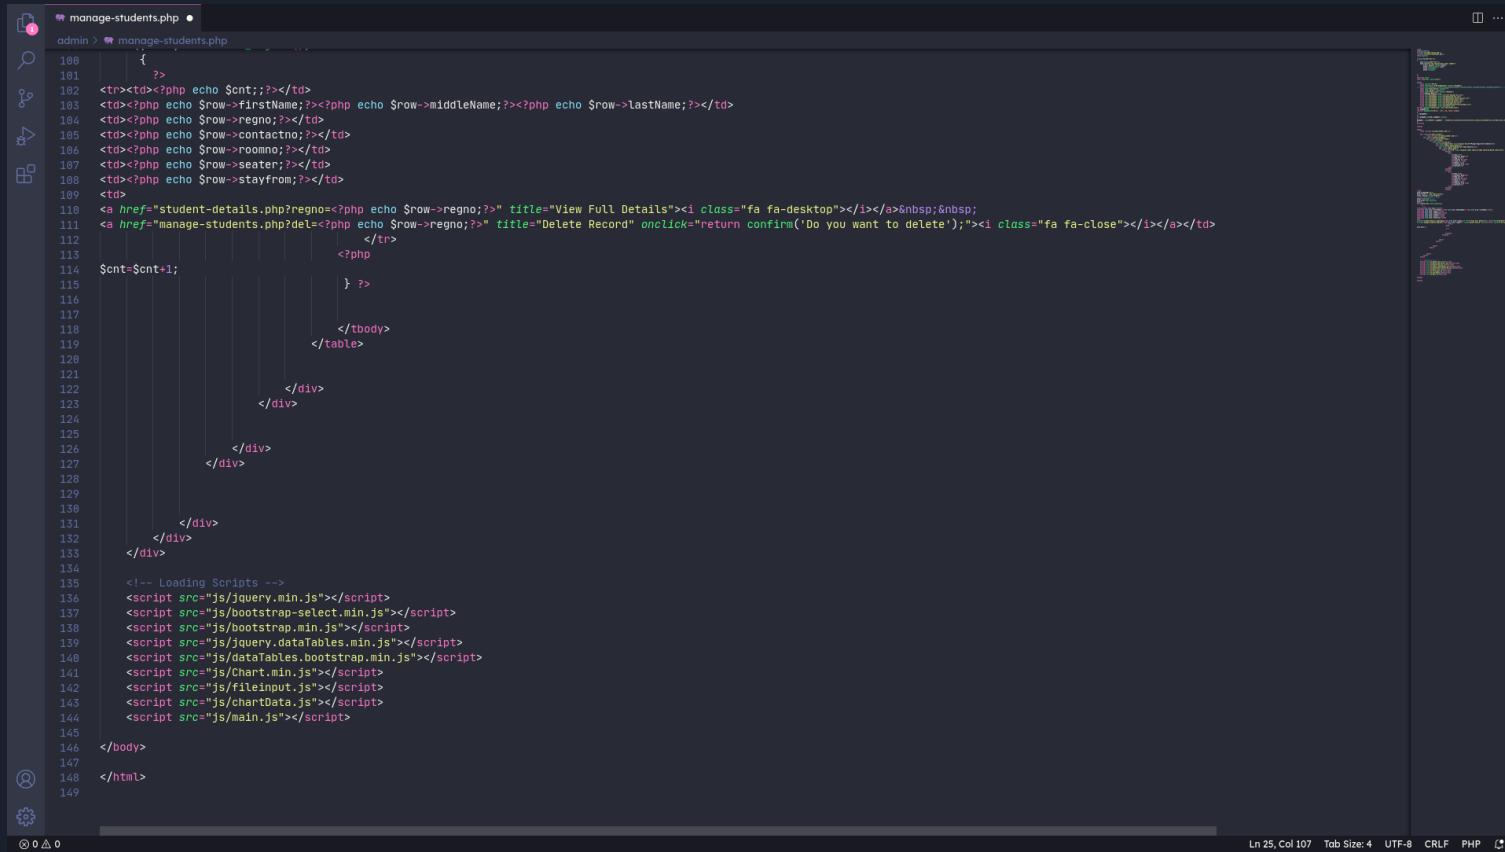

The screenshot shows a code editor interface with a dark theme. On the left is a sidebar containing file navigation, search, and other tools. The main area displays a PHP script named `manage-students.php`. The code is structured to manage registered students, featuring a header include, a sidebar include, and a content wrapper. It includes a table for displaying room details with columns for Sno., Student Name, Reg no., Contact no., Room no., Seater, Staying From, and Action. The code uses MySQLi prepared statements to fetch data from a database. The bottom right corner of the editor shows status information: Line 25, Column 107, Tab Size: 4, UTF-8, CRLF, and PHP.

```

## ManageStudent.php page-3

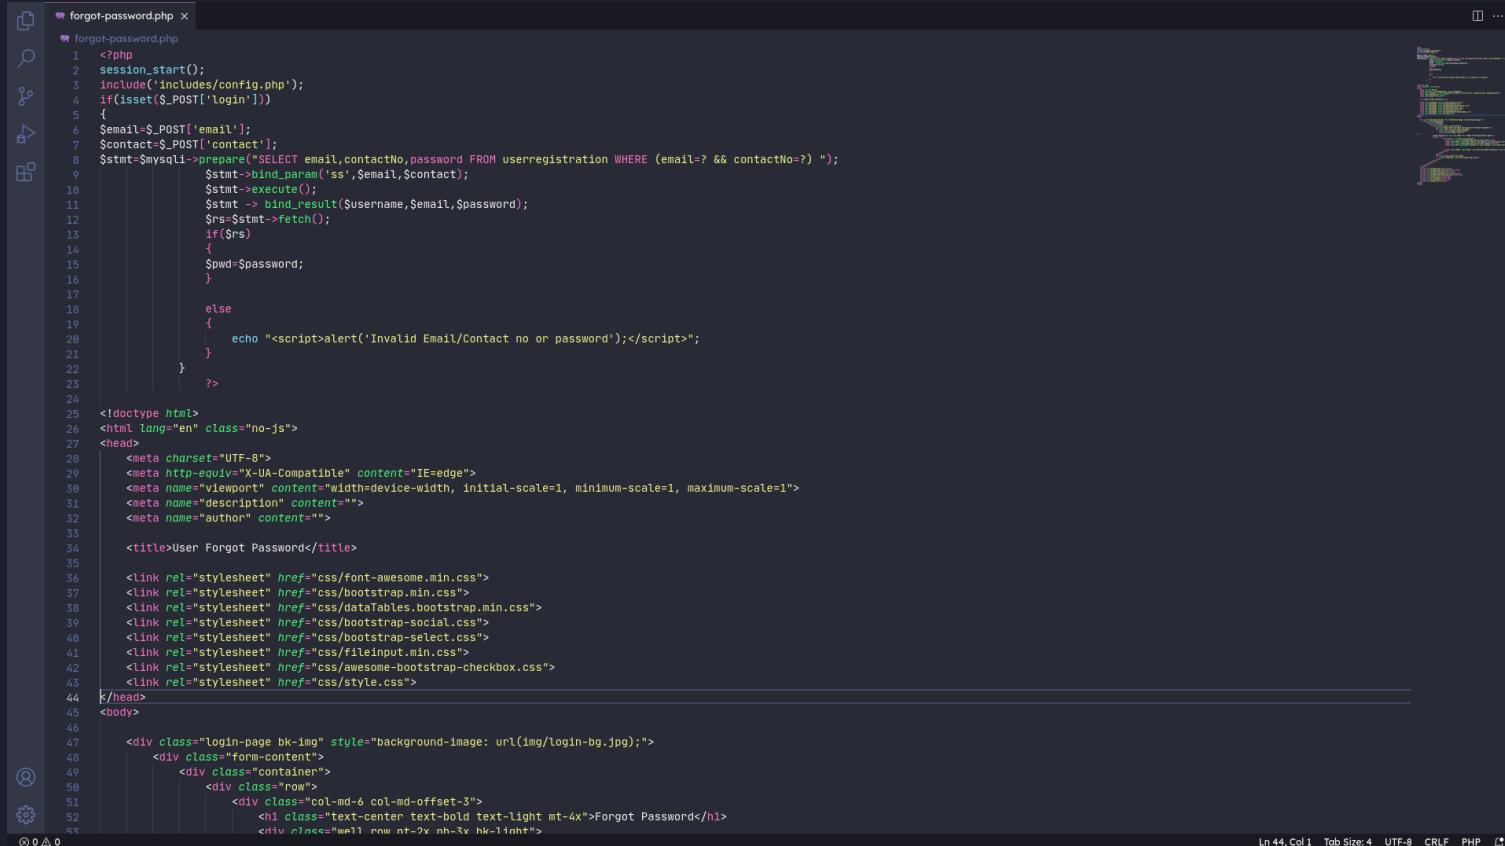

The screenshot shows a code editor window with the file `manage-students.php` open. The code is a PHP script for managing student records. It includes logic for displaying a list of students in a table, with links to view details or delete records. The script also includes CSS and JS imports at the bottom.

```
admin > manage-students.php
